

Year 6 – Pack 1 - Maths

Four Operations

Important Notes

- Please watch the video first to practise the skill for that lesson.
- Each lesson has a worksheet to go alongside the video.
- Once you have watched the video, select the worksheet from the website and work your way through the questions.
- When you have completed the worksheet, the relevant answer sheet can also be found on the website – please make sure you mark your work to see how you got on and don't forget to look over any mistakes!
- To complete your worksheet, you have the choice of printing it or writing your answers onto a separate piece of paper.
- The worksheets follow a simple pattern to our lessons in school – you will have the chance to practise the skill, have a go at some word problems and there will be some reasoning questions as well.

Week 1 Blended Learning

Follow the link to watch the video associated with each day of learning:

<https://whiterosemaths.com/homelearning/year-6/week-3/>

Day 1 – Add whole numbers with more than 4 digits

Day 2 – Subtract whole numbers with more than 4 digits

Day 3 – Inverse Operations (addition & subtraction)

Day 4 – Multi-step addition and subtraction problems

Day 5 – Add & subtract integers

Week 2 Blended Learning

Follow the link to watch the video associated with each day of learning:

<https://whiterosemaths.com/homelearning/year-6/week-4/>

Day 6 – Multiply 4 digit numbers by 1 digit

Day 7 – Multiply 2-digits (area model)

Day 8 – Multiply 2-digits by 2-digits

Day 9 – Multiply 3-digits by 2-digits

Day 10 – Multiply up to 4-digits by 2-digits
