

# Spring Term 2 Are Eggs Alive?

## I need to know and remember that:

- Eggs are laid by female animals.

- Birds, fish, reptiles, amphibians, and most insects come from eggs.

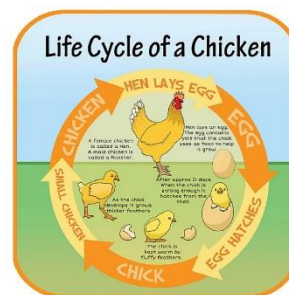

- Many animals hatch from eggs.

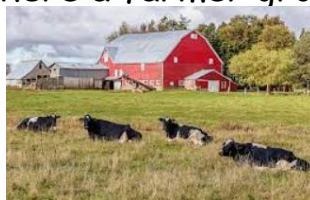

- Mammals give birth to live babies.

Mammals

- Animals, including humans have a life cycle.

- A farm is a place where a farmer grows fruits and vegetables and takes care of animals.

- Lots of animal babies are born in the springtime.

- Easter is a time when Christians think of new life. Eggs are a symbol of new life.

# To help my learning I need to know and understand these words:

**eggshell**-the outer part of an egg

**albumen**- the white, runny part of an egg

**yolk**-the yellow part of an egg

**pipping**-how a chick pecks at the shell with its beak to begin to hatch

**hatch**-when a baby animal comes out of its egg

**life cycle**-how an animal goes from being born to old age

**mammal**-a type of animal that can give milk to its babies

**reptile**-an animal with scales

**amphibian**-an animal that can live on land and water

**farmer**-a person who works on a farm

**season**-the time of year

**spring**-the season after winter before summer

## The names of these groups of animals:

birds

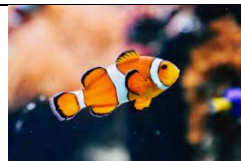

mammals

reptiles

insects

fish

amphibians

Are eggs alive?

Talk about this with your grown up!
